- Architectural glass throughout
- Internal manifestations

'CMS Enviro Systems took a very proactive approach and provided a sound level of understanding on the requirements of the project. The team worked hard within the time frame to provide robust solutions which fit specifically with the objectives of the brief'.

Barry Nicol - Balfour Beatty

As part of the project to build the new multi million pound hospital at Stobhill, CMS Enviro Systems Ltd were appointed by Balfour Beatty to complete the internal glazing works on this project. As one of Scotland's largest hospitals the new three-level 30,000m² facility began construction in late 2006 and was completed and ready for use in June 2009.

CMS worked to a fixed work schedule between October 2008 to April 2009 to successfully complete the various installation stages of the internal glazed partitions and architectural glass. The project included many bespoke elements including design and installation of individual glazed telephone booths.

Systems
Komfort Polar glazed partition systems.
