CMS Success in Fife Council Tender worth £7M

Fife Council has appointed CMS Enviro Systems to a £7M 3-year window & door replacement and recycling contract after their successful European tender bid.

The 3-year contract will see CMS Enviro Systems supply energy efficient 'A' rated 100% lead, barium and cadmium free PVCu windows to over 2,500 council properties throughout the Kingdom. The scope of the tender also incorporates the recycling of all extracted windows and doors from the replacement programme, helping Fife Council to achieve their community objectives and avoid unnecessary waste to landfill. The project forms part of Fife Council's Scottish Housing Quality Standard investment programme.

Fife Council are the first in Scotland to specify 'A' rated lead free windows on a window replacement contract and they hope that other Councils, national house builders and housing associations follow their lead in raising the bar on window quality in the UK. In addition to supplying the windows and doors and recycling existing installations, CMS are bringing a number of other services to the contract including a round-the-clock emergency response, mobile presentation unit; web based tracking technology and asset management system.

It's an exciting time for CMS and being appointed to this 3-year contract with Fife Council is the result of all the hard work and determination of our staff, for which I would like to say a big thank you!

Andrew Kerr
Managing Director, CMS Enviro Systems

Our Housing and Neighbourhood Service are now providing the tenants of Fife with the best possible window for them and the environment. This contract has been two years in the making and represents best practice in Europe.

Our specification was demanding but not unachievable as CMS have demonstrated. The Housing Partnership in Fife are delighted to be working with a company as committed to quality and the environment as CMS. As well as exceeding our rigorous technical expectations they are extremely customer focussed and offer any number of added value and corporate social responsibility benefits.

The new contract has given us a 5% saving on the traditional window supply arrangements so we have effectively moved to a far superior window and reduced costs in doing so. I would urge any individual or organisation embarking on window replacement and sharing Fife Council's objectives to contact myself for specification support. We are proud of what Fife Council have achieved in this window supply package and want to share the considerable benefits with a wider audience. Only in doing so will the UK window industry modernise and make the investment necessary to match the advanced products and environmental standards enjoyed elsewhere in Europe.

John Rodigan
Building Services Manager, Fife Council

Capital Gains

CMS Enviro Systems has beaten off stiff competition to win an Edinburgh City Council European Housing Tender.

The 4-year European framework agreement sees Edinburgh City Council commission CMS Enviro Systems for the supply and installation of new 100% lead, barium and cadmium free PVCu windows to thousands of properties in the city. As well as the window replacement programme, CMS has also been commissioned to recycle all of the extracted windows and doors which will avoid them being sent to landfill. The project is helping to make the properties compliant with the standards outlined in the 2016 Scottish Housing Standard Bill.

CMS are looking forward to providing the full service window replacement programme to the City of Edinburgh Council.

The 4-year framework will see CMS closing the loop by supplying, installing and recycling windows to thousands of council properties.

Managing Director, CMS Enviro Systems

CMS win Lanarkshire Green Business Award

CMS Enviro Systems Ltd have won a top environmental award at the Lanarkshire Business Excellence Awards.

CMS Enviro Systems picked up the Award for 'Best Green Business' after demonstrating clear links between improvements to their company performance, through environmental and sustainable processes and practices. The judges were impressed at how CMS Enviro Systems harnessed new business opportunities resulting from emerging environmental technologies and how those practices positively impacted on their business, including recycling 100% of extracted windows and doors from properties during window replacement contracts, which has led the company to securing business for the next four years.

“

We're delighted to win such a significant award. To have our environmental credentials recognised and rewarded at a local level is a great achievement for us.”

Safety First...

CMS complete ISO hat-trick with OHSAS 18001:2007

CMS Enviro Systems are now the first window fabricator and installer in Scotland to be awarded the United Kingdom Accreditation Service (UKAS)-accredited BS OHSAS 18001:2007 Health and Safety certificate from BM TRADA. CMS Enviro Systems Ltd is now part of an elite group that has attained all three accreditations.

BM TRADA Certification head of marketing & sales Karen Prendergast said: "CMS Enviro Systems' commitment to the use of these management tools is to be applauded. They will provide them with a robust framework to their business as well as a competitive advantage in these tough trading times."

CMS Enviro Systems now operates an externally verified and integrated Management System under the ISO 9001:2000 Quality, ISO 14001:2004 Environment and now BS OHSAS 18001:2007 Occupational Health & Safety Management Standards.

“

Health and safety is paramount in our industry and to be given this accreditation is testament to our commitment to improving health and safety standards for our workforce and our clients.”

Andrew Kerr
Managing Director, CMS Enviro Systems

Good VIBES as CMS win top business award

CMS Enviro Systems picked up the VIBES (Vision in Business for the Environment) award for Best Management Medium Category (between 50 and 250 employees) at the event held in Holy Rood, where other winners included Robert Wiseman Dairies, William Tracey Ltd and Stagecoach. CMS Enviro Systems won the award after demonstrating financial viability and cost savings through environmentally sustainable products and practices, including recycling, which has led the company to securing business for the next four years.

Presenting the awards, Minister for Environment Roseanna Cunningham said:

“ Many Scottish businesses, including those recognised at the VIBES Awards, are becoming increasingly aware that tackling their environmental impact can also deliver major economic benefits. ”

On the move

Mike Cormack
Contracts Manager

We are delighted to announce the appointment of Mike Cormack in the position of UPVC Regional Contracts Manager for the North and East of Scotland. Mike joins us from Ergon Windows where he was Sales Director for over 20 years and held the post of Managing Director for the past two years. Mike said, "I am very excited to be joining CMS Enviro Systems. CMS is a well-respected and forward thinking company and I'm looking forward to working with my new colleagues to help grow the business in the UK".

Philip Paterson
IT Systems Administrator

Joining Martin McCrimmon in the I.T department as I.T Systems Administrator is Philip Paterson.

Philip joins us from an extensive IT Project Management background in the Middle East and Europe. Philip said, "I am very much looking forward to working with everyone at CMS and hope to advance and simplify IT for all users. This will include a role out of a major server upgrade and a revamp of current systems".

Martin McCrimmon
Recycling Manager

Martin, as well as managing the I.T department, is now overseeing all aspects of the companies' recycling commitments and contracts in both Cumbernauld and Buko. Martin said, "It's great to be developing this new role as we look to expand our recycling operations in both these facilities".

Raymond McCulloch
Quantity Surveyor

Raymond assumes the role of Quantity Surveyor after several years experience in the construction industry and 6 years working with CMS. Raymond will be working closely with the design team, contacts managers and accounts department for all major projects. Raymond said, "With a lot of major works coming up I'm looking forward to working on these in my new capacity".
